Stamp and legally binding signature

Important Information about the Law for the Control of Military Weapons (KrWaffKontrG)

The Law for the Control of Military Weapons (KrWaffKontrG) is an extremely complicated item of legislation, and, in connection with the ILA Berlin, the Federal Ministry for Economic Affairs and Climate Action has approved the use of a simplified procedure by Messe Berlin GmbH.

In accordance with this procedure exhibitors are required to adhere to the following regulations:

1. By registering online they are obligated to register any exhibits which are subject to the KrWaffKontrG using the form "Statement concerning Military Weapons".
2. Military weapons must be registered with Messe Berlin GmbH no later than four weeks prior to the start of the exhibition.
3. Upon termination of the event such items must be removed immediately from the exhibition site.
4. Domestic exhibitors/manufacturers must comply with the KrWaffKontrG (maintenance of diary etc.), in accordance with specifically defined, internal company arrangements.
5. Foreign exhibitors/manufacturers must submit a certificate issued by the government of their respective countries, or by an officially authorized government agency, listing the military weapons, and indicating that these are intended solely for exhibition at the ILA.

On entering and leaving the Federal Republic of Germany the required certificate must be presented to the customs offices at the border/airport/seaport, and, together with an exhibitor's pass, serves as a copy of the approval document as specified in Article 12, Para. 3 and 4 of the KrWaffKontrG.

At the termination of the exhibition the military weapons must be re-exported immediately from the Federal Republic of Germany.

For its part, Messe Berlin is required to notify the Federal Office of Economics and Export Control (BAFA) and the Federal Ministry for Economic Affairs and Climate Action of the category, type and quantity of the military weapons that have been registered for the exhibition.

Please note that failure to strictly observe the regulations of the KrWaffKontrG is a punishable offence under German law.

An excerpt from the list of military weapons, dated November 11, 2002, is printed on the pages 3 and 4.

Excerpt from the Law for the Control of Military Weapons (KrWaffKontrG)

(Enclosure to § 1 Section 1 of the Military Weapons)

Part B

Other Military Weapons

I. Missiles

7. Guided missiles
8. Unguided missiles (rockets)
9. Other missiles
10. Firing installations (launch apparatus and equipment) for weapons in categories 7 and 9, including portable firing installations for anti-tank and anti-aircraft guided missiles
11. Firing installations for weapons in category 8, including portable firing installations and rocket launchers
12. Engines for weapons in categories 7 and 9

II. Combat aircraft and helicopters

13. Combat aircraft provided with at least one of the following features:
 - integrated weapons system, equipped in particular with targeting, fire control and corresponding avionics interfaces
 - integrated electronic weapons
 - integrated electronic weapons delivery system
14. Combat helicopters provided with at least one of the following features:
 - integrated weapons system, equipped in particular with targeting, fire control and corresponding avionics interfaces
 - integrated electronic weapons
 - integrated electronic weapons delivery system
15. Airframes for weapons in categories 13 and 14
16. Jet, turboprop and rocket engines for weapons in category 13

III. Warships and waterborne support craft

17. Warships, including those used for training purposes
18. Submarines
19. Small vessels with a speed in excess of 30 knots and equipped with offensive weapons
20. Minesweepers, minehunters, minelayers, vessels for breaking mine cordons, and other types of vessels for dealing with mines
21. Landing craft, landing ships
22. Tenders, ammunition carriers
23. Hulls for warships in categories 17 to 22

IV. Combat vehicles

24. Battle tanks
25. Other armored combat vehicles including armored combat support vehicles
26. Special purpose vehicles of all kinds, developed specifically for using weapons in the categories 1 to 6
27. Chassis for combat vehicles in categories 24 and 25
28. Turrets for battle tanks

V. Guns

29. a) Machine guns, excluding water-cooled types
b) Submachine guns excluding those models adopted by armed forces prior to September 2, 1945
c) Fully automatic guns excluding those models adopted by armed forces prior to September 2, 1945
d) Semi-automatic guns excluding those models adopted by armed forces prior to September 2, 1945, and guns for hunting and sporting purposes
30. Mechanical grenade weapons, guns for firing grenades, grenade pistols
31. Cannons, howitzers, grenade throwers of all kinds
32. Automatic cannons
33. Armored self-propelled gun carriages for weapons in categories 31 and 32

34. Barrels for weapons in categories 29, 31 and 32
35. Breech actions for weapons in categories 29, 31 and 32
36. Magazines for automatic cannon

VI. Light anti-tank weapons, flame- throwers, mine laying and throwing systems

37. Low recoil, non-steering, portable and anti-tank weapons
38. Flame-throwers
39. Systems for laying and throwing land- mines

VII. Torpedoes, mines, bombs, separate ammunition

40. Torpedoes
41. Torpedoes without warheads (explosive charge)
42. Torpedo bodies (torpedoes without warhead – explosive charge – and without homing device)
43. Mines of all kinds
44. Bombs of all kinds including water bombs
45. Hand flame cartridges
46. Hand grenades
47. Field engineer's explosives, shaped and sticking charges, and explosive mine clearance devices
48. Explosive charges for weapons in category 43

VIII. Other forms of ammunition

49. Ammunition for weapons in categories 31 and 32
50. Ammunition for weapons in category 29 excluding cartridge ammunition with solid jacketed soft core shells, provided that
 - the shell does not contain any additives, in particular a tracer, incendiary or explosive charge, and provided that
 - cartridge ammunition of the same caliber is used for hunting or sporting purposes
51. Ammunition for weapons in category 30
52. Ammunition for weapons in categories 37 and 39
53. Rifle grenades
54. Shells for weapons in categories 49 and 52
55. Propellants for weapons in categories 49 and 52

IX. Other main components

56. Warheads for weapons in categories 7 to 9, and 40
57. Fuses for weapons in categories 7 to 9, 40, 43, 44, 46, 47, 49, 51 to 53, and 59, excluding propellant fuses
58. Homing devices for weapons in categories 7, 9, 40, 44, 49, 59, and 60
59. Submunition for weapons in categories 7 to 9, 44, 49, and 61
60. Submunition without fuses for weapons in categories 7 to 9, 44, 49 and 61

X. Dispensers

61. Dispensers for the systematic distribution of submunition

XI. Laser weapons

62. Laser weapons especially constructed to cause blindness
